THE

L'ADIES' COOK BOOK,

COMPILED BY THE

LADIES' AID SOCIETY

OF THE

FIRST PRESBYTERIAN CHURCH,

SCOTTDALE, PA.

SCOTTDALE. PA 1891. INDEPENDENT PRINT, SCOTTDALE, PA.

N PRESENTING this volume to the public, the compilers, the Ladies' Aid Society of the First Presbyterian Church, Scottdale, Pa., had two objects in view: First, to assist the busy housewives in keeping their tables supplied with wholesome, delicious food at the smallest cost; Second, to secure funds to be used for mission purposes. Many young housewives, and, in fact, some older ones, often work to a great disadvantage and waste of material by not knowing the best method of preparing There is a growing sentiment, however, for greater economy and better prepared food, leading the housewives everywhere to seek everything that will assist them in this laudable object, but a majority of the books written for housekeepers fail in their object, in that the recipes have been gathered from unreliable sources and frequently prove worthless.

The compilers of this work, however, have selected such recipes only as are of known merit, and have been used by the ladies whose names are signed to them. Each department has been supplied with a sufficient number and variety of recipes to suit all, and yet contain nothing worthless, and will be found of great benefit to every lady who takes pride in her table.

A lack of care in following recipes often renders worthless that which would otherwise prove a success, hence the necessity of exactness in preparing recipes. Knowing the worth and value of the volume, the compilers have no hesitancy in offering it to the public, hoping that it may receive a cordial welcome and a fair trial.

A Letter Which Speaks for Itself.

EAR SIR: -- I am beginning to feel somewhat settled in this new town. There is a good deal of push and vigor here and I sometimes wonder if it will last. I have no doubt it is the new works which are just starting here that has attracted the people, together with the moderate prices of natural gas, but do you know, William, I already fear I have made a grave mistake in coming here to locate. When I look around and take time to think and see that there is only one kind of manufacturing on anything like a large scale here, and stop to think what the result of a shut down, by strike, or other cause, in that one industry would be, I am convinced that your advice was sound. Your many industries, rolling mills, pipe works, blast furnace, railroad center, machine shops, grist mills, etc., etc., that cluster about Everson, (or Valley View as I hear some call it) beside the fact that it is the very center of the coke region, has convinced me that it is the best location, has the brightest future of all the locations I have had my attention called to. After reading this if you find me coming back to Everson you need not be surprised.

They tell me the Pennsylvania Railroad Company are about to make some extensive improvements at Everson. If you are sure they are, pick me out a nice lot, which you think suitable for my business, close to where the P. R. R. locate, and hold it for me and notify me and I will come and see you and decide, Wishing you success,

I am, as ever, your friend,

HENRY F.

To Capt. W. H. Brown, agent of Scottdale and Everson Land company, 401 Broadway, Scottdale, Pa.

Mrs. Dunlap.

SMOTHERED FIGS.—Three cupfuls of rich milk, one cupful of sugar; a lump of butter, two well-beaten eggs and two spoonfuls of corn-starch to thicken when the milk boils. Place a layer in a glass dish and spread sliced figs thickly over. Add more cream and another layer of figs; continue till all are used. Ice the top and serve cold.

Mrs. May B. Shotts.

Tarts.—Tarts are a very nice as well as ornamental addition to the tea table. Take the nicest puff paste, roll out a trifle thicker than for pie crust, cut with a biscuit cutter twice as many as you intend to make. In the center of half of them cut out a circle, dip them in cold water and lay upon the tops of the whole ones. Bake in a quick oven, but not to scorch them. Fill with jam, jelly or preserves. In cold weather, if kept in a dry place, they will keep for some time, and are convenient to have on hand They should not be filled until just before using.

Maude Loucks.

TAPIOCA WITH APPLES.—One cup of pearl tapioca soaked over night, add to this one quart of boiling water; stir well and let boil until done. Sweeten to taste. Pare, core and cut in halves one-half dozen nice tart apples, place in a pan with one-fourth cup of water and several spoonfuls of sugar sprinkled over. Bake in hot oven until a nice brown and then pour over them your tapioca. Let cool and serve with cream. Clara C. Smith.

FRUIT PUDDING—Mix one pint of flour into a rather thin batter, with rich cream; add salt to taste, and one gill of melted butter. Beat six eggs separately, very light; stir these in thoroughly and then add one quart of very nice, ripe dewberries. Pour into a well-buttered pan and bake. Eat with rubbed sauce.

One pound of soft white sugar, three quarters of a pound of butter, and half a nutmeg grated. This pudding is very light and nice. Chopped apple, or any other kind of fruit, can be substituted for the berries if preferred.

STUFFED PEPPERS—Get large peppers, cut around the stem, remove it and take out all the seeds. For the stuffing, use two quarts of chopped cabbage, a cupful of white mustard seed, three table spoonfuls of celery seed, two tablespoonfuls of salt, half a cupful of grated hosre radish. Fill each pepper with a part of this mixture and into each put a small onion and a little cucumber. Tie the stem on again, put the peppers in a jar and cover with cold vinegar.

Sadie Keddle.

YEAST.—Boil two ounces of the best hops in four quarts of water for half an hour, strain and let the liquor cool down to the warmth of new milk, then put in a handful of salt and half a pound of sugar. Beat up one pound of the best flour with some of the liquor and then mix well all together. Let this mixture stand until the third day, then add three pounds of potatoes boiled and mashed. Let it stand a day longer, stirring frequently and keeping it near the fire in an earthen vessel. Strain bottle and it is ready for use. The advantage of this yeast is that it ferments spontaneously, not requiring the aid of other yeast. If well cooked and kept in a cool place, it will keep for months.

GREEN PEA SOUP.—Put a fat, full-grown chicken to boil in five quarts of water. When it has boiled slowly for two hours; put into the pot two quarts of green peas. Let these poil until soft, then remove and mash them thoroughly.

Return the soup to the pot, adding a quarter of a pound of butter, salt and pepper to taste, and a tablespoinful of chopped parsley. Rub smooth a tablespoonful of flour into some of the butter, add that and let it boil up briskly for a minute or two. Remove the chicken and serve hot. This is the nicest way to make green pea soup. →CANDIES ↔

The great danger in candy-making is that of burning the sugar. To properly cook the candy requires a heat of about two hundred and fifty degrees. Less than that heat will leave the candy soft and sticky, A very little more than two hundred and sixty degrees will burn it. Here, then, is the need of care in candy-making.

In the cooking, allow the heat to reach the bottom of the pan only. Have a quick fire that the work may be done in the shortest possible time. When cooked for fifteen minutes, test a spoorful of the mass upon a cold plate. If it form a viscid, tenacious mass which forms a long, adherent thread when drawn out, then it is nearly done, and it needs special care lest it burn before the work be completed. Test frequently now, dropping a little in cold water. When the hardened portion is crisp as a pipestem, the cooking has gone far enough. Then comes the flavoring and coloring.

When the mass has cooled on a stone or buttered plate, so that it can be handled, it is ready for pulling rolling into sticks, shaping into forms, etc. The pulling process is simply a mechanical means of whitening the caudy. It is literally a pulling, the caudy being thrown on a book and pulled out from it, then being thrown on it again and again pulled, and so on as may be desired, the longer pulling giving the whiter candy.

For home made candies use pure materials and good fruit, Enough of earths and starch and decayed fruits are bought in the cheap candies of the stores.

CANDIED NUTS AND FRUITS—Three cupfuls of sugar, one cupful of water; boil until it hardens when dropped in water, then flavor with lemon. It must not boil after the lemon is put in, Put a nut on the end of a fine knitting needle, take out, and turn on the needle until it is cool. If the candy gets cold, set on the stove for a tew minutes. Malaga grapes, and oranges quartered, may be candied in the same way.

CHOCOLATE CARAMELS—Two cupfuls of sugar, one cupful of warm water, one-half cupful of grated chocolate, three-fourths of a cupful of butter. Let it boil without stirring until it snaps in water.
